

ABSTRACT OF THE DISCLOSURE

A wireless digital picture display frame is disclosed. The display frame
5 includes a wireless receiver that operates to receive a digital picture, a flat-panel
display that operates to render the digital picture, and a processor that operates to
control the receiving and rendering of the digital picture. The display frame further
includes a frame with constructs that encircle the flat panel display, and form a
housing to house the enumerated components. The digital picture may be a digital
10 painting/graphics rendition or a digital photograph.
